

Harshit Dwivedi | June 30, 2026 | 1,470 employees analyzed

PROBLEM: Predict employee departures for proactive retention.

KEY FINDINGS

STATUS: 16.1% attrition (237 left, 1,233 stayed). Industry target: 10-12%. Sales Department highest at 20.6%.

TOP PREDICTORS: Overtime patterns, income level, job satisfaction

HIGH RISK: Sales Reps 39.8%, Lab Techs 23.9%, new hires 0-2yr

26.3%. Income gap: \$1,419/month. Work-life balance: Poor rating shows 31% vs Excellent 11% attrition.

RECOMMENDATIONS

IMMEDIATE (30 Days)

- Meet all Sales Representatives for retention talks
- Audit overtime - mandate recovery breaks
- Review salaries under \$2,900/month

MEDIUM-TERM (90 Days)

- Mentorship for new hires (0-2 years)
- Flexible work pilot in Sales
- Career paths for high-risk roles
- Monthly satisfaction surveys

PREDICTION SYSTEM

Analyzes patterns (overtime, income, satisfaction, tenure).

75-82% accuracy identifying at-risk employees.

EXPECTED IMPACT

5% attrition reduction (16%→11%): ~\$500K annual savings + preserved knowledge + improved morale

LIMITATIONS

Predicts risk, not certainty. Can't see personal factors.

Needs quarterly updates. Use for support, not punishment.
